

TIM HEINIGER TRIO

Originally, the trio was founded as a means to an end, more precisely for the final concert of the Master's programme at the Bern University of the Arts. However, the collaboration of the three musicians turned out to be so fruitful that it is to be continued even after the completion of the student period: The trio's first album will be released next year.

The music - a gripping mélange of jazz, fusion and contemporary elements - is composed by Tim Heiniger. He draws inspiration from Kit Downes, Aaron Parks and Pat Metheny, among others, but also from the equally creative and virtuoso band members Michael Dubi and Xavier Käser.
